PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with over 3 years of experience building scalable web applications and institutional software solutions. Proficient in modern JavaScript/TypeScript ecosystems including React, Next.js, Node.js, Express, and databases (Supabase, PostgreSQL). Proven track record in multi-tenant SaaS architecture, integrating AI/LLM engineering workflows, and consulting with stakeholders to cut client operational costs by 50%.

TECHNICAL SKILLS

Frontend & Frameworks:	React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, Accessible Development (WCAG)
Backend & APIs:	Node.js, Express.js, RESTful APIs, Async JS, AI Engineering & LLM API Integration
Databases & Cloud:	Supabase, PostgreSQL, Database Management, Git/GitHub, Vercel/Netlify Deployment
Domain & Process:	Technical Architecture, Multi-Tenant SaaS Design, Client Communication, Agile/Scrum, Software Testing

FEATURED PROJECTS

Multi-Tenant Gym Management SaaS Platform — **Next.js | Supabase | TypeScript | Tailwind CSS**

- Architected and deployed a multi-tenant fitness management application featuring complete tenant data isolation, secure role-based access control, and real-time membership lifecycle tracking.
- Engineered an instant client-side pre-processed data filtering engine (`useMemo`) and custom scrollable table architecture, enabling zero-latency member search across 200+ records.
- Implemented daily check-in attendance logging with 10-second auto-regenerating QR tokens, automated subscription expiration alerts, and payment history tracking.

WORK EXPERIENCE

Full-Stack Software Engineer — Jul 2025 – Present | Nagpur, MH, India
Self-Employed

- Consulting with business clients to architect, build, and deploy modern web applications and SaaS tools using Next.js, Node.js, and Supabase.
- Designing scalable multi-tenant solutions and embedding AI capabilities into workflow applications for enhanced process automation.

Full Stack Developer & Technical Solutions Engineer — Jul 2020 – Jun 2025 | Nagpur, MH, India
Rubrics Softcon Private Limited

- **Full Stack Engineering:** Developed, tested, and maintained core web application modules using JavaScript and Node.js backend services, resulting in enhanced system stability and user retention.
- **Agile Collaboration:** Participated in cross-functional Agile sprints, leading code reviews and debugging sessions that improved overall codebase maintainability and reliability.
- **NAAC Accreditation System Lead:** Spearheaded end-to-end architecture and deployment of an in-house institutional assessment platform, enabling colleges to automate calculations across seven quality criteria for 5-year Self-Study Reports (SSR).
- **Business & Operational Impact:** Partnered directly with college management to convert complex accreditation compliance policies into structured software workflows, reducing client manual processing costs by 50%.

EDUCATION & CERTIFICATIONS

Full Stack Developer Career Path — Scrimba | Completed 2026
Comprehensive 100+ hours training covering React, Next.js, TypeScript, Node.js, Express, Databases, UI Design, Accessible Development, and AI Engineering.

Bachelor of Engineering (Information Technology) — G.H. Raisoni College of Engineering | Passed: May 2019
Nagpur, MH, India
